

Metek plc: Engineering Excellence in Modern Manufacturing

www.metek.co.uk

Our Wolverhampton Manufacturing Facility

Metek plc is a leading force in the UK's light steel construction sector, delivering precision-engineered solutions that support modern, sustainable building methods. Our facilities, people, and processes are built around one core principle: engineering with accuracy, safety, and innovation at every stage.

With over **21,000m² of indoor manufacturing space** and a growing workforce (up 25%), we're equipped to deal with the demands of this growing market in light steel frame construction.

Our Wolverhampton Manufacturing Facility was expanded in 2025 to accommodate an increased workforce and new advanced roll forming machinery.

With around **8,000m² of secure outdoor storage and accessible space** and over **£250K invested new equipment and technology**.

“Building the future with accuracy, safety, and innovation”

Pioneers in Light Steel Frame Solutions

Metek plc specialises in the design and manufacture of high-performance light gauge steel frame systems for a wide range of construction environments. Our expertise combines advanced roll-forming technology with decades of industry experience, enabling us to deliver reliable, scalable, and efficient structural solutions.

Our purpose-built facilities support high-volume production, rapid project delivery, and rigorous quality control. From early design collaboration to final installation, we work closely with clients to ensure every system meets the highest standards of safety, durability, and performance.

We manufacture the innovative 'Solar Tree' system, UK-made solar canopies. These help clients decarbonise their portfolio with confidence and clarity. For further details visit: www.solartree.co.uk

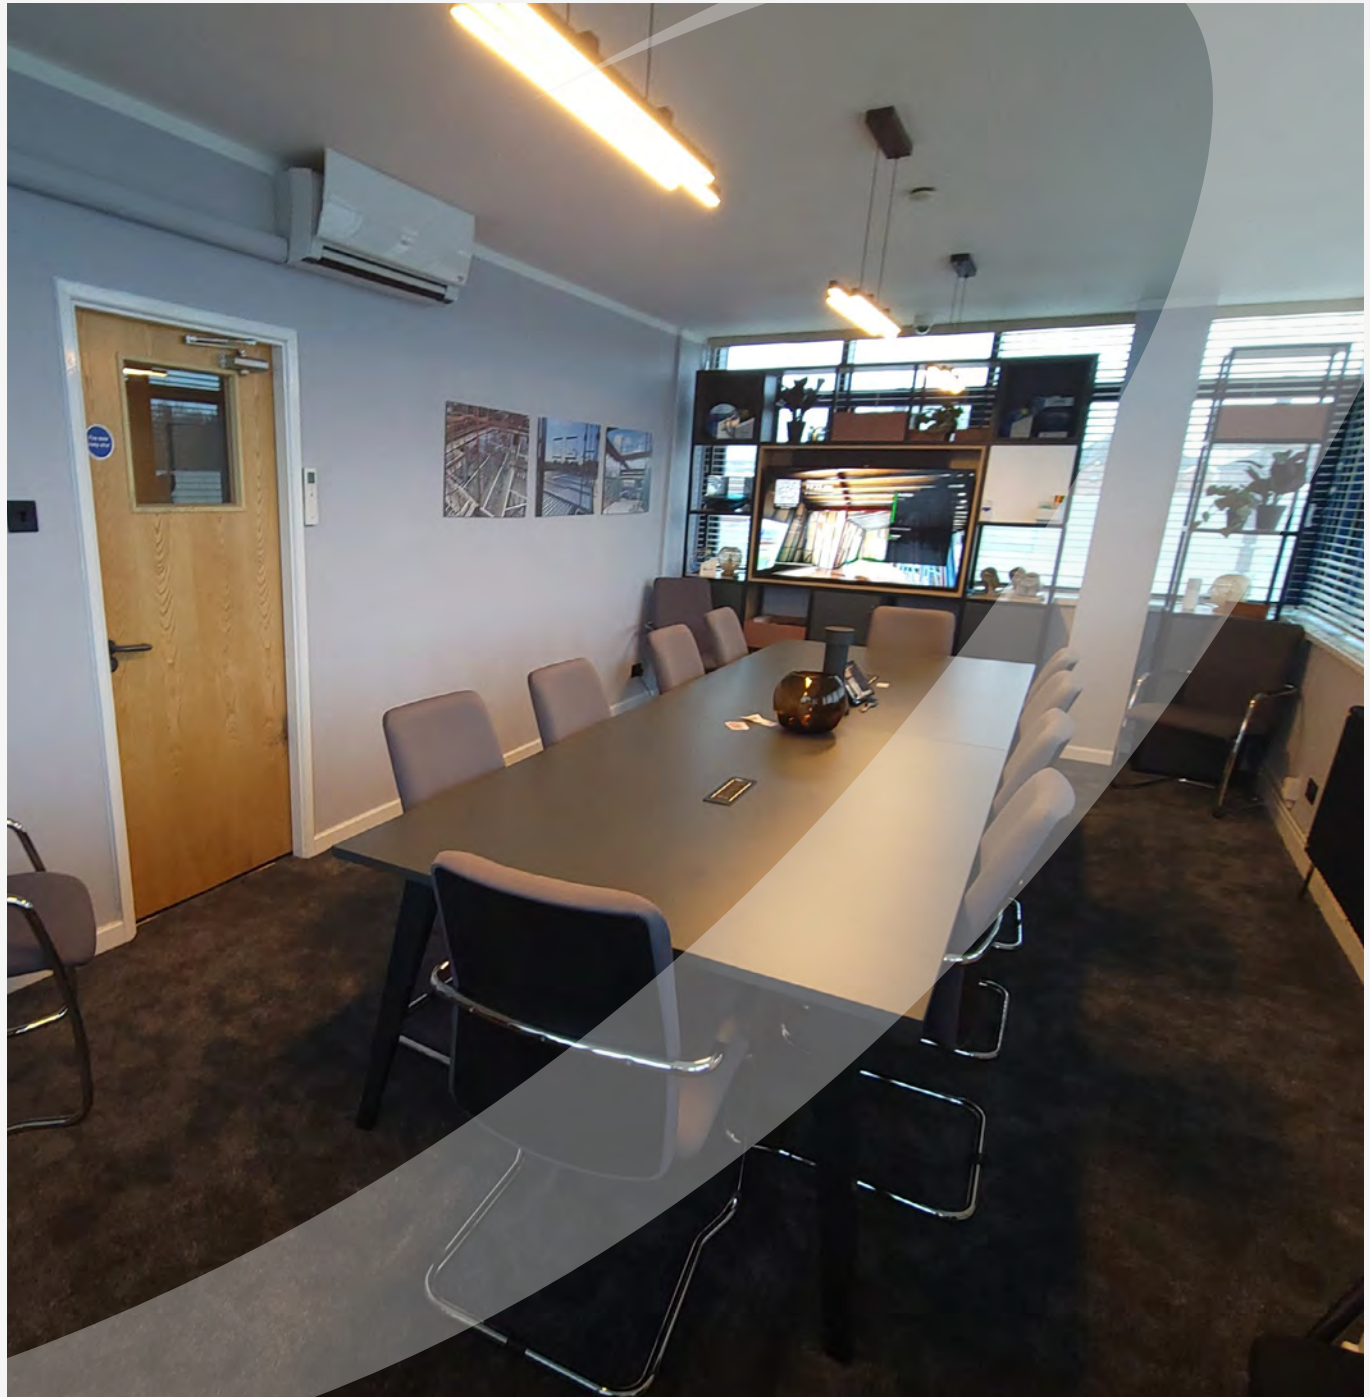

Professional Workspaces Designed for Collaboration

Our modern meeting and training environments reflect our commitment to clarity, professionalism, and effective communication. These spaces support technical reviews, client presentations, and workforce development, ensuring seamless coordination across every project.

Key Features:

- Fully equipped meeting rooms with integrated presentation technology
- Flexible training spaces for workforce development
- Bright, contemporary interiors that promote productivity
- On-site amenities supporting staff and visitor needs

These spaces reflect our commitment to professionalism, clarity, and collaborative working.

Innovative, dynamic & sustainable, we are leaders in the UK light steel construction space

Our manufacturing facilities are equipped with advanced machinery engineered for high-precision metal processing, roll forming, and fabrication. Designed for accuracy, efficiency, and uncompromising safety, our production lines support the delivery of modern offsite construction systems — including 2D panelised, light gauge steel frame systems to provide a full structural solution, as well as SFS infill to alternative frames.

Capabilities Include:

- Automated metal forming and cutting
- High-volume coil processing
- Custom fabrication and assembly
- Controlled, repeatable production workflows
- A skilled workforce trained in safe, efficient operation

Our Commitment to Safety & Excellence

Safety is embedded in our culture and central to every aspect of our operations.

Our 'Don't Walk By' philosophy empowers every team member to take responsibility for maintaining a safe, proactive, and supportive working environment.

- ISO-certified processes
- Dedicated project management and support

We invest in our people, our processes, and our technology to ensure we deliver exceptional results. Through continuous improvement, rigorous training, and a focus on innovation, we remain committed to setting industry standards in quality, reliability, and performance.

Metek — delivering engineered solutions built on trust, innovation, and technical excellence.
